

Text Styles

Every character-level attribute Pages can carry

Heading One

Body text under heading one. Sublime converts files. This paragraph exists so that the paragraph has more than one line when laid out on a page, which matters for line spacing, indents, and column tests. It says nothing else of interest.

Heading Two

Body text under heading two.

Heading Three

Plain, **bold**, *italic*, ***bold italic***, underlined, ~~struck through~~, **red**, **large**, small, `monospace`, **highlighted**, ^{super^{script}}, _{sub_{script}}, AND SMALL CAPS.

A run in the *Emphasis* character style and one in **Strong**.

Unicode: café, naïve, 日本語, emoji 😊, and an em—dash.

A quoted paragraph in the Quote style, indented on both sides.
